1. Company Overview

TechFlow Solutions was founded in 2018 by Maria Rodriguez, a former Google engineer with 15 years of experience in cloud architecture. Starting from a small office in San Francisco with just three employees, the company has grown into a global enterprise cloud provider with over 150 team members across 12 countries. TechFlow Solutions specializes in enterprise-grade cloud infrastructure, managed services, and digital transformation consulting.

Our mission is to democratize enterprise cloud computing by making world-class infrastructure accessible to businesses of all sizes. We believe that every organization deserves the same level of reliability, performance, and security that was once only available to tech giants.

1.1 Corporate Headquarters & Global Presence

Our corporate headquarters is located at 450 Mission Street, Suite 1200, San Francisco, CA 94105. We maintain regional offices in New York, London, Berlin, Singapore, Tokyo, Sydney, Sao Paulo, Dubai, Bangalore, Toronto, and Nairobi. Each regional office is staffed with local engineering teams, sales representatives, and customer success managers who understand regional requirements and compliance frameworks.

1.2 Leadership Team

Maria Rodriguez serves as CEO and Chief Architect, bringing her deep expertise in distributed systems design. The executive team includes CTO James Chen (formerly AWS Principal Engineer, 18 years experience), CFO Sarah Patel (formerly Goldman Sachs VP of Technology Finance), VP of Engineering Akira Tanaka (formerly Microsoft Azure team lead), and VP of Sales Elena Kowalski (formerly Salesforce Enterprise Sales Director).

1.3 Awards & Recognition

- Gartner Cool Vendor in Cloud Infrastructure, 2023
- Forbes Cloud 100 List, ranked #47 in 2024
- AWS Advanced Technology Partner
- Google Cloud Premier Partner
- ISO 27001, SOC 2 Type II, HIPAA Compliant
- Best Places to Work in Technology, Glassdoor 2024

1.4 Customer Base

TechFlow Solutions serves over 2,400 active customers ranging from early-stage startups to Fortune 500 enterprises. Notable customers include Meridian Healthcare Systems (450-bed hospital network), Velocity Financial Group (mid-market investment firm), GreenLeaf Agriculture (precision farming platform), Stellar Education Corp (online learning platform serving 2M students), and Pacific Logistics Inc (global shipping and supply chain company). Our customer retention rate stands at 97.3% as of Q4 2024, reflecting our commitment to customer satisfaction.

2. Cloud Infrastructure Services

TechFlow's Cloud Infrastructure platform provides a comprehensive suite of compute, storage, and networking services designed for enterprise workloads. Our infrastructure is built on tier-4 data centers located in 8 regions worldwide, ensuring low latency and high availability for customers globally.

2.1 Virtual Private Servers (VPS)

Our Virtual Private Server offering provides dedicated compute resources with full root access, starting at \$15/month for the Starter tier. Each VPS instance runs on enterprise-grade hardware with Intel Xeon processors and NVMe SSD storage, delivering consistent performance for production workloads.

Tier	vCPUs	RAM	Storage	Bandwidth	Price/mo
Starter	1	2 GB	50 GB SSD	2 TB	\$15
Developer	2	4 GB	100 GB SSD	4 TB	\$30
Professional	4	8 GB	200 GB SSD	8 TB	\$60
Business	8	16 GB	400 GB SSD	16 TB	\$120
Enterprise	16	32 GB	800 GB SSD	32 TB	\$240
High-Perf	32	64 GB	1.6 TB NVMe	Unlimited	\$480
Dedicated	64	128 GB	3.2 TB NVMe	Unlimited	\$960

All VPS instances include automated daily backups with 30-day retention, DDoS protection, private networking capabilities, and IPv4/IPv6 dual-stack support. Enterprise and above tiers include dedicated CPU resources (no shared cores), ensuring consistent performance even under peak load conditions. Custom configurations are available for customers requiring specific hardware requirements such as GPU instances (NVIDIA A100, H100) for machine learning workloads.

2.2 Bare Metal Servers

For workloads requiring maximum performance and hardware-level control, TechFlow offers bare metal server options. These dedicated physical servers provide single-tenant compute with no hypervisor overhead, ideal for high-frequency trading, real-time analytics, and large-scale database deployments.

Config	CPU	RAM	Storage	Network	Price/mo
BM-S	Xeon E-2388G 8C	64 GB	2x1TB NVMe	10 Gbps	\$350
BM-M	Xeon Gold 6338 32C	256 GB	4x2TB NVMe	25 Gbps	\$850
BM-L	2x Xeon Plat 8380 80C	512 GB	8x4TB NVMe	100 Gbps	\$2,200
BM-GPU	Xeon + 4x A100 80GB	512 GB	8x4TB NVMe	100 Gbps	\$8,500

2.3 Block Storage

TechFlow Block Storage provides high-performance, network-attached storage volumes that can be dynamically attached to any VPS or bare metal instance. Volumes are triple-replicated across separate physical hosts for durability, with 99.999% data durability SLA.

- Standard SSD: \$0.10/GB/month, up to 3,000 IOPS, ideal for general workloads

- Performance SSD: \$0.20/GB/month, up to 15,000 IOPS, for database workloads
- Ultra SSD: \$0.40/GB/month, up to 64,000 IOPS, for mission-critical applications
- Archive HDD: \$0.02/GB/month, for cold storage and backup archives
- Volumes can be resized on-the-fly without downtime
- Snapshots available at \$0.05/GB/month with instant restore capability

2.4 Object Storage

Our S3-compatible object storage service provides scalable, durable storage for unstructured data including media files, backups, logs, and data lake workloads. Objects are replicated across three availability zones within each region.

Tier	Access Pattern	Price/GB/mo	Retrieval	Min Duration
Standard	Frequent	\$0.023	Free	None
Infrequent	Monthly	\$0.0125	\$0.01/GB	30 days
Archive	Yearly	\$0.004	\$0.03/GB	90 days
Deep Archive	Rarely	\$0.00099	\$0.05/GB	180 days

3. Managed Database Solutions

TechFlow's Managed Database service eliminates the operational burden of database administration while providing enterprise-grade performance, security, and reliability. Our platform supports multiple database engines, each optimized for specific workload patterns.

3.1 Relational Databases

We offer fully managed PostgreSQL, MySQL, and MariaDB instances with automated failover, point-in-time recovery, and read replicas. Starting at \$45/month for a single-node development instance, our relational database service scales to multi-terabyte production clusters.

Plan	Engine	vCPUs	RAM	Storage	Connections	Price/mo
Dev	PG/MySQL	1	2 GB	20 GB	25	\$45
Starter	PG/MySQL	2	4 GB	50 GB	100	\$90
Standard	PG/MySQL	4	8 GB	100 GB	250	\$180
Business	PG/MySQL	8	16 GB	250 GB	500	\$360
Enterprise	PG/MySQL	16	32 GB	500 GB	1000	\$720
Premium	PG/MySQL	32	64 GB	1 TB	2000	\$1,440

All managed database plans include: automated daily backups with 35-day retention, SSL/TLS encryption in transit and at rest, automatic minor version upgrades, monitoring dashboards with alerting, and 24/7 DBA support for Enterprise and Premium plans. Read replicas can be added for \$0.50/vCPU/hour in any supported region for global read scaling.

3.2 NoSQL Databases

For applications requiring flexible schemas and horizontal scalability, we offer managed MongoDB, Redis, and Apache Cassandra clusters. Our NoSQL offerings are designed for real-time applications, caching layers, IoT data ingestion, and time-series workloads.

MongoDB Atlas (Managed)

Fully managed MongoDB clusters with automated sharding, replica sets, and point-in-time recovery. Pricing starts at \$65/month for a 3-node replica set with 2 GB RAM per node. Enterprise clusters support up to 128 shards with cross-region replication.

Redis Cache & Streams

Managed Redis instances for caching, session management, real-time analytics, and message queuing. Available in standalone and cluster modes with persistence options. Starting at \$25/month for 1 GB RAM. Maximum cluster size: 500 GB across 90 shards.

Apache Cassandra

Managed Cassandra clusters for write-heavy workloads requiring linear scalability. Multi-datacenter replication is built-in. Starting at \$200/month for a 3-node cluster with 8 GB RAM and 200 GB storage per node. Ideal for IoT telemetry, messaging platforms, and recommendation engines.

3.3 Data Warehouse

TechFlow DataVault is our managed analytical data warehouse built on columnar storage with MPP (Massively Parallel Processing) architecture. It supports standard SQL with extensions for semi-structured data (JSON, Parquet, Avro) and integrates with popular BI tools.

Tier	Compute Units	Storage	Concurrency	Price/mo
Starter	2 CU	100 GB	5 queries	\$150
Standard	8 CU	500 GB	20 queries	\$500
Business	32 CU	2 TB	50 queries	\$1,800
Enterprise	128 CU	10 TB	200 queries	\$6,500
Unlimited	512 CU	100 TB	Unlimited	\$22,000

4. Content Delivery Network (CDN)

TechFlow CDN accelerates content delivery through a global network of 200+ Points of Presence (PoPs) across 45 countries. Our CDN supports static assets, dynamic content acceleration, video streaming, and API caching with edge computing capabilities.

4.1 Pricing

CDN pricing is based on bandwidth consumed at \$0.08/GB for the first 10 TB per month, with volume discounts for higher usage tiers.

Monthly Usage	Price/GB	Included Requests	Edge Locations
0 - 10 TB	\$0.080	10M	All 200+
10 - 50 TB	\$0.060	50M	All 200+
50 - 150 TB	\$0.040	200M	All 200+
150 - 500 TB	\$0.030	1B	All 200+
500 TB+	Custom	Custom	All 200+

4.2 Features

- HTTP/2 and HTTP/3 (QUIC) support for optimal performance
- Automatic SSL/TLS certificate provisioning via Let's Encrypt
- Custom SSL certificate support with SNI and dedicated IP options
- Real-time analytics dashboard with per-URL performance metrics
- Edge-side includes (ESI) for dynamic content assembly
- WebSocket support for real-time applications
- Image optimization: automatic format conversion (WebP, AVIF), resizing, and compression
- Video streaming: HLS and DASH adaptive bitrate streaming with transcoding
- DDoS protection: Layer 3/4/7 mitigation included at no extra cost
- Geo-restriction and geo-routing capabilities
- Cache purge API with instant propagation (< 2 seconds globally)
- Origin shield to reduce origin load by up to 90%

4.3 Edge Computing

TechFlow Edge Functions allow you to run JavaScript/TypeScript code at the edge, enabling personalization, A/B testing, authentication, and request routing without origin round-trips. Each function execution is billed at \$0.50 per million invocations with 50ms included CPU time. Edge functions support KV storage for state management at \$5/month per namespace with 1 GB included.

5. Load Balancing & Traffic Management

Our load balancing service distributes incoming traffic across multiple backend servers to ensure high availability and optimal performance. Starting at \$25/month, TechFlow Load Balancers support HTTP/HTTPS, TCP, and UDP protocols with advanced routing capabilities.

5.1 Load Balancer Types

Type	Protocols	Algorithms	Health Checks	Price/mo
Application	HTTP/HTTPS	Round-robin, Weighted, Least-con	HTTP, TCP	\$25
Network	TCP/UDP	Hash, Round-robin	TCP, ICMP	\$35
Global	Any	Geo-routing, Latency-based	All	\$100

5.2 Advanced Features

- SSL/TLS termination with automatic certificate management
- Sticky sessions with configurable cookie-based or IP-based affinity
- Rate limiting: configurable per-IP and per-endpoint limits
- Web Application Firewall (WAF) integration at \$50/month add-on
- Backend health monitoring with automatic failover (< 5 second detection)
- Connection draining for graceful server removal during deployments
- Request/response header manipulation for routing and debugging
- Proxy protocol v2 support for preserving client IP addresses

6. DevOps & CI/CD Pipeline Services

TechFlow DevOps Platform provides an integrated suite of tools for building, testing, deploying, and managing applications. Our platform supports container orchestration, infrastructure as code, and automated deployment pipelines.

6.1 Container Registry

Private Docker-compatible container registry with vulnerability scanning, image signing, and automated builds. Storage starts at \$5/month for 5 GB with \$0.10/GB additional.

6.2 Kubernetes Service (TKS)

TechFlow Kubernetes Service provides fully managed Kubernetes clusters with automated upgrades, scaling, and monitoring. The control plane is free; you only pay for worker nodes.

Worker Node	vCPUs	RAM	Price/hr	Monthly Est.
Small	2	4 GB	\$0.04	\$29
Medium	4	8 GB	\$0.08	\$58
Large	8	16 GB	\$0.16	\$116
XLarge	16	32 GB	\$0.32	\$233
GPU	8 + T4	32 GB	\$0.65	\$474

TKS includes integrated service mesh (Istio-based), ingress controller, horizontal pod autoscaling, cluster autoscaling, pod disruption budgets, and network policies. Multi-cluster federation is available for Enterprise customers at no additional cost.

6.3 CI/CD Pipelines

Our integrated CI/CD service provides build minutes starting at \$0.005/minute with parallel execution support. Features include GitHub/GitLab/Bitbucket integration, artifact caching, deployment approvals, canary deployments, blue-green deployments, and rollback capabilities. Free tier includes 1,000 build minutes per month.

6.4 Infrastructure as Code

TechFlow supports Terraform, Pulumi, and our native TechFlow CLI for infrastructure provisioning. We provide a comprehensive Terraform provider covering all TechFlow services with drift detection, state locking, and plan visualization in our dashboard. Our Terraform modules library includes 50+ pre-built modules for common architectures.

7. Data Analytics Platform

TechFlow Analytics is our end-to-end data processing and analytics platform that enables organizations to collect, process, store, and visualize data at any scale. The platform integrates with our managed databases and object storage for seamless data pipelines.

7.1 Stream Processing

Real-time data ingestion and processing powered by Apache Kafka and Apache Flink. Our managed Kafka service starts at \$150/month for a 3-broker cluster handling up to 50,000 messages per second. Flink jobs are billed at \$0.10 per Flink Compute Unit per hour.

7.2 Batch Processing

Apache Spark clusters on demand for ETL, data transformation, and large-scale analytics. Clusters auto-scale based on workload and terminate automatically when jobs complete. Pricing: \$0.15 per Spark Unit per hour, with spot instances available at 70% discount.

7.3 Business Intelligence

TechFlow BI is our built-in dashboarding and reporting tool that connects to any TechFlow data source. It supports SQL querying, drag-and-drop visualization, scheduled reports, and embedded analytics. Free for up to 5 users, then \$15/user/month. Enterprise features include row-level security, custom branding, and API access.

8. Machine Learning Infrastructure

TechFlow ML provides the infrastructure and tools for building, training, and deploying machine learning models at scale. Our platform supports popular frameworks including PyTorch, TensorFlow, JAX, and scikit-learn with optimized GPU scheduling.

8.1 Training Clusters

Instance	GPUs	GPU Memory	vCPUs	RAM	Price/hr
ML-Dev	1x T4	16 GB	8	32 GB	\$0.65
ML-Train	1x A100	80 GB	16	64 GB	\$3.20
ML-Multi	4x A100	320 GB	64	256 GB	\$12.80
ML-Mega	8x A100	640 GB	128	512 GB	\$25.60
ML-H100	8x H100	640 GB	128	1 TB	\$48.00

8.2 Model Serving

Deploy trained models as scalable REST APIs with automatic scaling, A/B testing, and model versioning. Serving instances start at \$0.10/hour for CPU inference and \$0.80/hour for GPU inference. Our platform supports model formats including ONNX, TensorRT, TorchScript, and SavedModel.

8.3 ML Ops

Integrated experiment tracking, model registry, feature store, and automated retraining pipelines. Track metrics, parameters, and artifacts across experiments. The model registry supports approval workflows for production deployment. Feature store provides both offline (batch) and online (real-time) feature serving.

9. Serverless Computing

TechFlow Functions is our serverless compute platform that lets you run code without provisioning or managing servers. You pay only for the compute time consumed, measured in 1ms increments.

9.1 Supported Runtimes

- Node.js 18, 20 (LTS)
- Python 3.10, 3.11, 3.12
- Go 1.21, 1.22
- Rust (stable)
- Java 17, 21
- Ruby 3.2, 3.3
- Custom containers (Docker images up to 10 GB)

9.2 Pricing

Functions are billed per invocation (\$0.20 per 1M requests) plus compute duration (\$0.0000167 per GB-second). The free tier includes 1M requests and 400,000 GB-seconds per month. Maximum execution duration is 15 minutes for standard functions and 60 minutes for long-running functions.

9.3 Event Sources

Functions can be triggered by HTTP requests, scheduled events (cron), message queues, object storage events, database change streams, and custom webhooks. Our event gateway handles retry logic, dead-letter queues, and event filtering.

10. Monitoring & Observability

TechFlow Monitor provides comprehensive observability for your infrastructure and applications with metrics, logs, traces, and alerting in a unified platform.

10.1 Metrics

Collect and visualize infrastructure and custom application metrics at 10-second resolution. Over 300 built-in integrations for common services, databases, and frameworks. Custom metric ingestion via StatsD, Prometheus, or OpenTelemetry protocols. Retention: 15 months for full-resolution data, 5 years for rollups.

10.2 Logging

Centralized log management with full-text search, structured log parsing, and log-based alerting. Ingestion at \$0.50/GB with 30-day hot retention and \$0.10/GB/month cold archive. Supports syslog, journald, Fluentd, and direct API ingestion.

10.3 Distributed Tracing

End-to-end request tracing with automatic instrumentation for popular frameworks. Compatible with OpenTelemetry, Jaeger, and Zipkin. Trace retention: 15 days at \$0.30 per million spans.

10.4 Alerting

Configurable alerting with multi-channel notifications (email, Slack, PagerDuty, OpsGenie, webhooks). Supports composite alerts, anomaly detection, and alert correlation. On-call scheduling with escalation policies included for Enterprise customers.

11. Disaster Recovery & Backup

TechFlow provides comprehensive disaster recovery and backup solutions to protect your data and ensure business continuity. Our DR infrastructure spans multiple geographic regions with automated failover capabilities.

11.1 Backup Services

- Automated daily snapshots for all VPS instances (included, 30-day retention)
- Database point-in-time recovery with 1-second granularity (35-day retention)
- Cross-region backup replication for Enterprise customers
- Application-consistent backups with pre/post backup scripts
- Backup encryption with customer-managed keys (AES-256)
- Instant restore from any backup point with minimal downtime

11.2 Disaster Recovery Plans

Plan	RPO	RTO	Regions	Failover	Price/mo
Basic	24 hours	4 hours	1	Manual	Included
Standard	1 hour	1 hour	2	Semi-auto	\$200
Premium	5 minutes	15 min	3	Automatic	\$800
Mission-Critical	0 (sync)	< 1 min	3+	Automatic	\$2,500

12. Migration Services

TechFlow's dedicated migration team helps organizations move their infrastructure, applications, and data to our platform with minimal disruption. We have successfully completed over 500 migrations ranging from simple website hosting to complex multi-tier enterprise architectures.

12.1 Migration Packages

Package	Scope	Duration	Support	Price
Self-Service	Documentation + tools	Self-paced	Community	Free
Guided	1-10 servers	2-4 weeks	Dedicated PM	\$5,000
Managed	10-50 servers	4-8 weeks	Full team	\$25,000
Enterprise	50+ servers	8-16 weeks	War room	\$75,000+

All migration packages include a pre-migration assessment, architecture review, testing environment, and post-migration validation. We support lift-and-shift, re-platforming, and re-architecting approaches based on your needs.

12.2 Migration Tools

Our proprietary migration toolkit includes: TechFlow Migrate Agent (server discovery and dependency mapping), Database Migration Service (schema conversion and data replication for 15+ database engines), Storage Mover (parallel file transfer at up to 10 Gbps), and Application Migration Assistant (containerization of legacy applications).

13. Consulting & Professional Services

TechFlow's consulting division provides expert guidance on cloud architecture, digital transformation, and technology strategy. Our consultants bring an average of 12 years of industry experience across cloud platforms.

13.1 Service Offerings

Service	Engagement	Deliverables	Rate
Architecture Review	1-2 weeks	Report + roadmap	\$250/hr
Performance Audit	1 week	Optimization plan	\$250/hr
Security Assessment	2-3 weeks	Pentest report + remediations	\$300/hr
Cost Optimization	1 week	Savings report	\$200/hr
Staff Augmentation	Ongoing	Embedded engineers	\$180/hr
Training Workshops	1-5 days	Custom curriculum	\$3,000/day

13.2 Customer Success Program

Every Enterprise customer is assigned a dedicated Customer Success Manager (CSM) who conducts quarterly business reviews, provides proactive optimization recommendations, and coordinates across TechFlow teams. Professional customers receive monthly check-in calls and access to our technical advisory board.

14. Pricing & Packaging

TechFlow Solutions offers flexible pricing across all services with pay-as-you-go, reserved, and committed-use options. Volume discounts are available for customers with significant spend commitments.

14.1 Support Tiers

TechFlow Solutions offers three main support tiers to match every organization's needs. Basic Support at \$29/month includes email support and basic troubleshooting with 24-hour response time. Professional Support at \$79/month includes priority phone support and advanced diagnostics with 2-hour response time. Enterprise Support at \$199/month includes 24/7 dedicated support, custom integrations, and 15-minute response time with a named technical account manager.

Feature	Basic (\$29/mo)	Professional (\$79/mo)	Enterprise (\$199/mo)
Email Support	Yes	Yes	Yes
Phone Support	No	Priority	24/7 Dedicated
Response Time	24 hours	2 hours	15 minutes
Named TAM	No	No	Yes
Slack Channel	No	Shared	Private
Architecture Review	No	Annual	Quarterly
Training Credits	0	5 hours/year	20 hours/year
Custom Integrations	No	No	Yes

14.2 Billing Options

- Pay-as-you-go: Hourly/monthly billing with no commitment, pay only for what you use
- Reserved (1-year): 20% discount on compute and database resources with capacity reservation
- Reserved (3-year): 40% discount on compute and database resources with capacity reservation
- Committed Use: Custom pricing for annual spend commitments over \$100,000/year
- Startup Program: \$10,000 in credits over 12 months for qualifying startups
- Education Program: 50% discount for accredited educational institutions
- Nonprofit Program: 30% discount for registered 501(c)(3) organizations

15. Service Level Agreements

TechFlow Solutions is committed to providing reliable, high-performance services. Our SLAs define the uptime guarantees and service credits for each product category.

Service	Monthly Uptime SLA	Credit (< SLA)	Credit (< 99%)
VPS / Bare Metal	99.95%	10%	30%
Managed Databases	99.99%	10%	25%
Load Balancer	99.99%	10%	25%
CDN	99.9%	10%	25%
Object Storage	99.99%	10%	25%
Kubernetes (TKS)	99.95%	10%	30%
Serverless Functions	99.95%	10%	25%
Monitoring Platform	99.9%	10%	25%

Uptime is calculated monthly based on the total number of minutes in the billing period minus any excluded maintenance windows. Scheduled maintenance is communicated at least 72 hours in advance and typically occurs during off-peak hours (2-6 AM local time). Emergency maintenance affecting availability triggers automatic service credits.

Service credits are applied as a percentage of the monthly bill for the affected service and are credited automatically within 5 business days. Credits do not require a support ticket for Enterprise customers. Maximum credit per incident is capped at 100% of the monthly service fee.
